LIST OF CONTENTS

NUMBER 1/2

III Editorial

SELECTED PAPERS FROM THE
"TECTONOPHYSICS—*QUO VADIS*?" CONFERENCE

C. J. Talbot 1 *Quo vadis* tectonophysics? With a pinch of salt!

Lothar Ratschbacher, Wolfgang Frisch, Chengsheng Chen and Guitang Pan 21 Deformation and motion along the southern margin of the Lhasa block (Tibet) prior to and during the India–Asia collision

REGULAR PAPERS

Discussion
A. L. Hales 55 Speculations about crustal evolution

Hal Noltimier and Dork Sahagian 65 Tectonic style of Venus: an analog to polar "ice-pack tectonics"

M. Ritzert and W. R. Jacoby 81 The geoid signal of 2-D convection with temperature and pressure-dependent rheology

V. De Rubeis, C. Gasparini, A. Solipaca and P. Tosi 103 Seismotectonic characterization of Italy, using statistical analysis of geophysical variables

Iaakov Karcz, Joseph Forrai and Gershon Steinberg 123 Geodetic network for study of crustal movements across the Jordan–Dead Sea Rift

Mario Grasso, Claus-Dieter Reuther and Luigi Tortorici 135 Neotectonic deformations in SE Sicily: the Ispica fault, evidence of Late Miocene–Pleistocene decoupled wrenching within the central Mediterranean stress regime

NUMBER 3

C. B. Papazachos, A. A. Kiratzi and B. C. Papazachos 147 Rates of active crustal deformation in the Aegean and the surrounding area

John A. Korstgård and Ian Lerche 181 Flexural plate representation of Danish Central Graben evolution

NUMBER 4

III Introduction

THEMATIC SECTION: GONDWANA—PART 1

Extended Abstract
John J. W. Rogers 211 Contrast between an old and a young Gondwana shield

Raphael Unrug 215 The supercontinent cycle and Gondwanaland assembly: component cratons and the timing of suturing events

Patrice de Caritat and Jean Braun 241 Cyclic development of sedimentary basins at convergent plate margins—1. Structural and tectonothermal evolution of some Gondwana basins of eastern Australia
